

ISO 14064-1:2018 Greenhouse gases

Description

The training course analyses the content, structure and requirements of EN ISO 14064-1:2018 Greenhouse gases — Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals.

Climate change and environmental degradation are an existential threat to Europe and the world. To overcome these challenges, the European Green Deal will transform the EU into a modern, resource-efficient and competitive economy, ensuring net emissions of greenhouse gases by 2050.

The training course includes practical examples and is addressed to:

- Managers of private sector and industrial companies that develop and implement Carbon Footprint Assessments
- Managers and members of Energy and Environment Committees,
- Officials of local authorities who are required to meet the requirements of the new climate law (2022)
- Managers of Carbon Footprint Assessment Systems
- Scientific staff: Chemical Engineers, Mechanical Engineers, Electrical Engineers involved in the preparation of policy recommendations for environmental management
- Energy & Environmental Management Consultants
- Environmental Auditors.
- Internal Auditors of GHG

By completing the Training Course, participants will be able to understand the basic principles of EN ISO 14064-1:2018 standard, will be able to develop, implement and

evaluate Management Systems based on the requirements of the standard and finally will gain experience of practical application through examples and exercises.

Upon completion of the training program, a Certificate of Attendance with TÜV AUSTRIA Academy (Hellas) certification is issued.

Course Language: **English**
